

BDP® 581/591 maleimide

<http://hk.lumiprobe.com/p/bdp-581-591-maleimide>

BDP 581/591 maleimide is a thiol reactive dye for the labeling of sulphydryl groups of proteins and peptides.

The dye is useful for a variety of applications, such as microscopy, fluorescence polarization experiments, and even ROS detection (upon reaction with ROS, the dye changes its fluorescence).
