

## (C26) D,L-Carnitine

<http://hk.lumiprobe.com/p/c26-carnitine>

Determination of the qualitative pattern of acylcarnitines can be of diagnostic and therapeutic importance. (C26) D,L-Carnitine could be used as a diagnostic marker in dried blood spots from newborns and patients with X-linked adrenoleukodystrophy. (C26) D,L-Carnitine could also be a marker for Zellweger spectrum disorders (ZSD) which are a group of genetic metabolic disorders caused by a defect in peroxisome biogenesis.
