

LumiCell CDr20 Microglia Stain

<http://hk.lumiprobe.com/p/cdr20-microglia-stain>

CDr20 (Cell Designation red 20) is a high-performance fluorogenic chemical probe for labeling microglia in both cell cultures and live brains. CDr20 is a substrate of microglia-specific UDP-glucuronosyltransferase Ugt1a7c. The glucuronidation of CDr20 by Ugt1a7c produces bright red fluorescence in microglial cells coinciding with the expression of markers P2ry12, Csf1r, Cx3cr1, and Iba-1 [1].

CDr20 could be a valuable tool for identifying and visualizing microglia in neural disorder studies both *in vitro* and *in vivo* and for CDr20-based fluorescent-activated microglial cell sorting (FACS).
