## Iodo-PEG3-carboxylic acid

<http://hk.lumiprobe.com/p/i-peg3-carboxylic-acid>

A molecule containing carboxylic acid (COOH) group and alkyl iodide functional group.

Alkyl iodides are powerful alkylators. They react with a variety of nucleophiles, very active against thiol groups, amines, alcoholates, and phenolates.

This molecule allows performing a variety of conjugations via a flexible and hydrophilic PEG3 linker.
