

sulfo-Cyanine5.5 DBCO

<http://hk.lumiprobe.com/p/sulfo-cy55-dbc>

Sulfo-Cyanine5.5 is a dye with far-red emission approaching the NIR range. It has found application in non-invasive live-organism imaging. This particular derivative of sulfo-Cyanine5.5, the DBCO (or ADIBO) derivative, contains cycloalkyne for copper-free conjugation of this fluorophore with various organic azides.

The reaction between DBCO and azides is blazingly fast, orders of magnitude exceeding the rate of copper-catalyzed reaction between azides and terminal alkynes. It is also catalyst-free.

This reagent can be used to conjugate sulfo-Cyanine5.5 dye to a variety of azide-labeled molecules.

外观:	深藍色固體
分子量:	1317.69
分子式:	C ₆₁ H ₅₉ N ₄ K ₃ O ₁₄ S ₄
溶解度:	適合水、DMF、DMSO
质量控制:	NMR ¹ H, HPLC-MS (95%)
